AKADEMI BIJAK SAMPAH

# Waste Management Academy

Based on the Report of Environmental Behavior study conducted by Indonesia Central Bureau of Statistics (Badan Pusat Statistik -BPS), only 9% of the waste that we produced is recycled. The rest of the waste are going to landfill, rivers, buried, or even burned, further polluting our environment. This is the results of many factors, including the low awareness and knowledge of the people about how to treat their waste responsibly.

**Akademi Bijak Sampah (AKABIS - Waste Management Academy) is an education model created by Waste4Change to raise awareness towards responsible waste management.**

By holding AKABIS, we aim to encourage and inspire participants to get to know their waste, what problems does it create, and how to treat waste responsibly starting from oneself.

### We offer 2 programs of AKABIS:

#### - AKABIS-Class

1. A 2-hour In-class training and discussion
2. Held in client's institution
3. Akabis-Class is suitable for:

- General public who became the agents of change for a better future of waste management in Indonesia
- Institution

#### - AKABIS-Xperience

1. A 6-hour educational tour and interactive discussion
2. Visit to landfill
3. Visit to W4C Facilities
4. Akabis-Xperience is suitable for:

- General public who became the agents of change for a better future of waste management in Indonesia
- Institution

“

Thanks to Waste4Change, we spent a day smelling, seeing, sorting and talking about waste! I feel an overwhelming shame that this is the footprint we leave on earth.

Good people, let's all REDUCE, REUSE and RECYCLE.

- **Yongmei Zhou**

Program Leader, Equitable Growth, Finance & Institutions World Bank

# AKABIS Class for Institution

**We believe that education for both decision-makers and employees in various institutions will give positive impacts in creating responsible waste management in Indonesia.**

We hope that the comprehensive waste management education will influence others with similar or different businesses to take action on implementing waste management sustainably.

In AKABIS Class, we give a 2-hour education session to deepen the participants' knowledge regarding solid waste management in general and how to implement 3R (Reduce, Reuse, Recycle) principles for themselves and in their working area.

We take on inspirational and fun approach, as we also conduct an interactive game and discussion session to brainstorm which actions are the most appropriate to make our clients' institutions become more responsible in managing waste.

### Benefits:

- Increased knowledge of both the employees and managements in terms of waste management
- Improving the corporate's image in terms of sustainability
- Encouraging ideas generated by employees to manage waste using the context of their own institution

## OUR EXPERIENCE

# Clients: Embassy of Finland

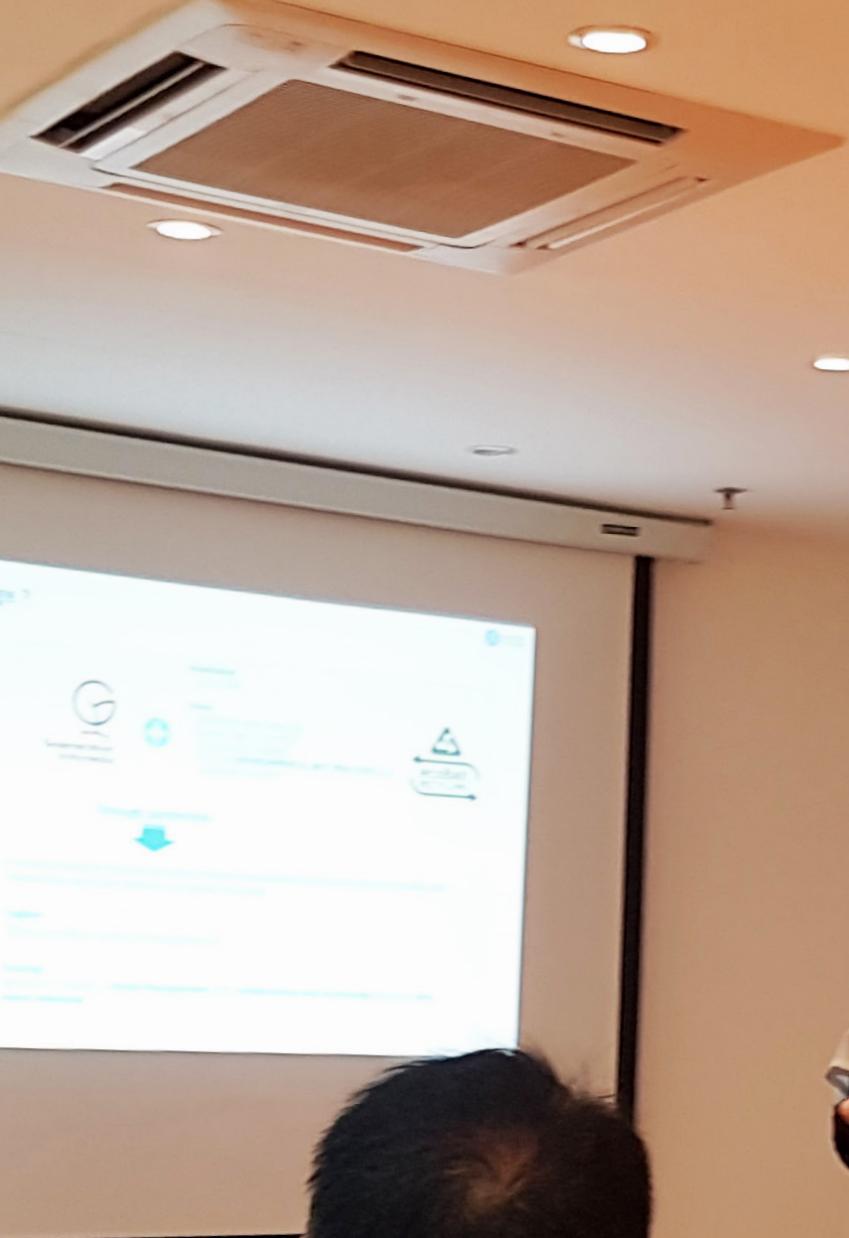

Knowledge about responsible solid waste management and the 3R (Reduce- Reuse, Recycle) Concept is very important, especially for institutions. Waste4Change facilitates institutions to be agents of change so they can encourage responsible solid waste management in their environments.

As a country with a strong foundation in sustainability, the Embassy of Finland wants to play its role in waste management in Indonesia through green office practices. They were keen to implement solid waste management in their office in order to reduce waste that are transported to TPST Bantar Gebang. Akabis Class in the Embassy of Finland was held in 2018 and around 20 employees from different sectors joined the training session in order to achieve the goal of implementing an integrated waste management.

The activities that were conducted include:

- Sharing Session:  
**Why do we need to be responsible for our solid waste management?**
- Sharing Session:  
**How can we conduct responsible solid waste management starting from our office?**
- Interactive Games and Open Discussion

02. —

## AKABIS Class for Public

**To spread the concept of responsible solid waste management, we also provide education sessions for the general public.**

Our trained and passionate educators are ready to deliver knowledge on how to manage our waste responsibly and other topics related to your event, talk show, seminar, conference, and workshop.

### Benefits:

- Enhanced knowledge of solid waste management for your events' participants
- Attract people who are passionate in solid waste management issue, or environmental issues in general, to participate in your events

## OUR EXPERIENCE

### The Neglected Debris: Paper, Letter and Waste Discussion

### Client: PT Galeri Museum Macan

The ancient method of making paper is not only recognized as a way of reading history, but also as a way to understand the philosophy of letters, eastern culture, and the sustainability of culture and the environment.

The Museum of Modern and Contemporary Art in Nusantara (also known as Museum MACAN) invited Waste4Change to enlighten the ways to sustainably manage solid waste, especially paper waste, to the audience, specifically those who are enthusiastic towards the topic of sustainability.

Activities and topics that were delivered were:

- Open discussion with fellow panel speakers and audiences on solid waste management
- The importance of responsible solid waste management
- How to handle and treat waste responsibly and sustainably, especially paper waste
- How to mitigate adverse effects of waste for humans and other living creatures

# AKABIS Xperience for Institution

**Seeing is believing. With this idea in mind, Waste4Change provides AKABIS Xperience program, an interactive educational tour to raise the participants' awareness through field visits that stimulate our 4 senses.**

By showing them the reality of Indonesian waste management conditions, the participants are expected to be better informed and could further help to increase the public awareness regarding waste management crisis in Indonesia.

We also provide AKABIS Xperience for institutions who wish to educate their employees and workers on where their office's waste ends up and how to start managing waste responsibly in their own institutions.

### Benefits:

- Enhanced knowledge regarding responsible solid waste management of both the employees and managements
- Acquired knowledge in terms of managing waste in institution
- Landfill and W4C facilities visit

## OUR EXPERIENCE

# Clients: PT Bank DBS Indonesia

PT Bank DBS Indonesia is one of Waste4Change's clients that implements ZWTL (Zero Waste To Landfill) concept in its office's waste management system.

To increase the performance of ZWTL program at PT Bank DBS Indonesia office, all of PT Bank DBS Indonesia employees were required to enroll in the Akabis Xperience program held by Waste4Change. Through AKABIS Xperience activities, PT Bank DBS Indonesia employees were expected to understand more about responsible waste management concept.

Activities that are conducted during the AKABIS Xperience were:

- Shock Moment: all participants are invited to see the magnitude of waste problems by visiting Bantar Gebang Landfill
- O'Moment: responsible waste management presentation regarding why they must be responsible with their waste
- Facility Tour: visiting W4C's facilities, including our Material Recovery Facility and Composting House

## 04. —

# AKABIS Xperience for Public

**By bringing together our clients' CSR program and our AKABIS Xperience service, we invite the general public to get first-hand experiences on how their waste are managed in the local landfill and Waste4Change's waste management facilities.**

This program aims to support our clients' mission to educate and support a behavioral change of the people in treating their waste.

Through AKABIS Xperience, we aspire to spread a specific mindset regarding waste: that waste isn't supposed to be thrown away and forgotten, but to be treated responsibly. Benefits:

### Benefits:

- Increase public awareness about solid waste management
- Support CSR programs under the theme of environment and sustainability
- Landfill and W4C facility visit

## OUR EXPERIENCE

### AKABIS Xperience for YSEALI (Young Southeast Asian Leader Initiative) Marine Debris Expedition 2018

## Client: Implemented by Divers Clean Action and hosted by the US Embassy

Waste4Change became one of the facilitators for YSEALI (Young Southeast Asian Leader Initiative) Marine Debris Expedition 2018. The event is implemented by Divers Clean Action and hosted by the US Embassy.

Through Akabis Xperience, Waste4Change delivered hands-on experiences and ensured the continuous efforts in supporting behavioral change regarding waste management.

61 young leaders from 11 Southeast Asia countries were given a brief presentation about the current waste management condition by Waste4Change representatives, followed by a visit to Waste4Change's Material Recovery Facility (MRF), Waste4Change's Composting

Area, and the infamous Bantar Gebang landfill – located not far from Waste4Change's head office.

Upon visiting Waste4Change's MRF, the YSEALI's young participants were encouraged to express their curiosities. Moreover, they were also given a close-up introduction about Waste4Change's Black Soldier Flies (BSF) nurseries and how Black Soldier Flies holds a big part in the organic waste composting process.
