3R SCHOOL PROGRAM

We believe that young people will be the agents of change for a better future in solid waste management. Therefore, we are focusing our education program to young generations and we start with school because it hosts 45.3 million of Indonesia's students. Not only we educate students, we also assist teachers, and form task force to ensure sustainability for our program.

Our approach is informative, inspiring, and fun while still making sure that awareness about solid waste management and 3R (Reduce, Reuse, Recycle) is increased for the students and teachers and assisting them in implementation in their schools.

OUTPUT & BENEFIT

For Schools

- Increased knowledge and capacity of students and teachers about the 3R concept.
- Schools can contribute to supporting and executing a responsible waste management system in their facility.
- Available for every school located in Indonesia, we support our clients' school to become an example of a green and sustainable educational facility.
- For schools located in Jakarta, we help to support the school to become a potential candidate to apply for the Sekolah ADIWIYATA program.

For Clients

- The real action in encouraging the implementation of 3R and responsible waste management in Indonesia -- especially in the educational sector.
- Supporting the green concept of our clients brand image.

OUR EXPERIENCE

3R Green School bersama Yayasan Unilever Indonesia

Yayasan Unilever Indonesia bersama dengan Waste4Change mengadakan program 3R Green School dengan tujuan mendidik murid-murid di 9 sekolah di Tangerang mengenai pengelolaan sampah yang bertanggung jawab lewat prinsip 3R, sekaligus mendorong mereka untuk memiliki kesadaran soal isu-isu lingkungan.

Dalam program ini, murid-murid diberikan edukasi yang komprehensif untuk memahami permasalahan sampah yang ada sekaligus cara untuk memilah dan mengelola sampah dengan menerapkan prinsip 3R demi mengurangi jumlah sampah yang berakhir di TPA di Tangerang Selatan.

Di penghujung program, murid dari setiap sekolah yang terpilih memiliki pemahaman yang lebih baik mengenai pentingnya kepedulian terhadap lingkungan dan diharapkan bisa berkomitmen untuk secara konsisten mengelola sampah mereka secara bertanggung jawab. Hasil yang dicapai antara lain:

Di penghujung program, murid dari setiap sekolah yang terpilih memiliki pemahaman yang lebih baik mengenai pentingnya kepedulian terhadap lingkungan dan diharapkan bisa berkomitmen untuk secara konsisten mengelola sampah mereka secara bertanggung jawab. Hasil yang dicapai antara lain:

- Peningkatan kesadaran dan perubahan perilaku para pegawai terhadap pengelolaan sampah yang bertanggung jawab
- Tingkat daur ulang sampah yang meningkat
- Berkurangnya produksi sampah residu
- Meningkatkan insentif ekonomi sebagai hasil dari mengkompos
